

a Runs available after Wave 1

PIOP2 carries a full emomatching cohort, so the external replication is no longer unprepared.

b G0 blockers after Wave 1

U1 ✓	native TR of both targets	2.0 s, zero variance
U2 ✓	discarded volumes	non_steady_state cols
U4 ✓	24 motion / aCompCor / FD	4 runs to exclude
U5 ✓	events onset origin	all task runs
U11 ✓	PIOP2 paired target	222 emo runs
U13 ✓	execution interpreter	h197 venv locked
U14 ✓	torch / scipy / sklearn	torch 2.10 + CUDA 12.8
U15 ✓	OpenNeuro egress	6,055 files fetched
U3 •	dummy volumes before archiving	not determinable
U6 •	BOLD for the targets	Wave 2
U10 •	family / duplicate metadata	no column exists
U26 •	Wave 2 download volume	probe pending

✓ resolved by Wave 1 • still open. U9 and U12 are retired by re-extraction; U17 by the dataset-prefixed subject key.
